Team Agreements Document

Team name: Team Builders
Team leader: Eigintas Urbanavičius

How they were elected:

- Proposed themselves to be in that position, with agreement from the other team members.

Team leaders responsibilities:

- Calling meetings
- Managing GitHub
- Reviewing and keeping up on the teams progress to meet deadlines
- Conflict resolution
- Final say on team meeting time

Team members:
Eigintas Urbanavičius
Karolis Paškevičius
Kęstutis Karneckas
Mantas Delgiado
Dovydas Valantiejus
Team ambition: 7
Team rules:

1. Participate in all meetings/calls, give a reason if you cannot attend them.
2. Participate in all upcoming teambuilding events.
3. Don’t blindly vibecode, actually review the code if it was AI-generated.
4. Communicate progress.
5. Review other teammates PRs.

Principles governing work distribution:
Tasks are distributed during live discussions during calls/live sessions.
Similar workload for each member / according to one's skill.
Work will first be distributed according to the team members strengths (some can have more experience doing work with Databases, one with frontend/UI etc.)
Capacity constraints: Some team members have work and or have other University coursework/modules to attend/study for.
Team meeting times and group work:

- Two days before deadline.
- Wednesday before or after lecture for live meetings.
- Group work is done individually at the teammates individual pace, their works deadline will be decided in calls, and their progress monitored by the team leader.
- Other meeting times will be dynamic, calls when they are needed.

How progress will be tracked (calls, standups, trello, etc):
Discord calls/messages, group chat, teambuildings, live sessions before or after lecture.
Punishment for breaking team agreements: Not invited to teambuilding event.
Will we use AI during labwork?: Yes
